

Dark Matter at LHC/ATLAS

- Nothing yet seen
- Sensitivity improving slowly

ATLAS/LHC CDM

- LHC will restart for physics (Run 3) | early 2021
- Many analyses underway (Adelaide leading) – Harish Potti
- Longer term outlook – HL-LHC
 - ATLAS Upgrade (Melbourne and Adelaide) – James Webb

Other Collider Activities

Existing activities:

- Belle II searches for dark particles (Phil Urquijo)

Future Possibilities:

- International Linear Collider (ILC)
 - Light the wall
- Electron-Ion Collider (Richard Garrett)
 - See tomorrow's talk on DIS
