

Annual Workshop 2021 – CDM Awards

The Outreach and Impact Award

1) level of active engagement based on number of activities (see below) and investment in each activity
("This award aims to recognise CDM members who actively engage in outreach/impact activities" and "above and beyond the expectations of outreach involvement in the Centre")

2) breadth of public target
("promote the work of the Centre and particle physics outside of academia and to the broader community")

3) level of innovation and novelty
("new outreach activities")

4) level of leadership
("Initiative in organising or instigating")

list of outreach/impact activities:

- Involvement in National Science Week events
- Dark Matter Day
- Events put on by your department or faculty
- Giving public talks
- Visiting a school/s
- Writing an article for The Conversation or similar
- Running a public workshop
- Engagement with the Centre's Innovation Laboratory
- Others (Specify)

The Collaboration and Centre Values Award

1) Level of engagement based on number of activities (see below) and investment in each activity
("actively and effectively collaborated with members")

2) Breadth of cross-node / cross-CDM partners / interdisciplinary collaborations
("at other nodes, across disciplines (between theoretical and experimental particle physics) or CDM partner organisations")

3) Alignment with Centre values
("in line with the Centre's values around collaboration and a focus on equity, diversity and inclusion")

List of activities:

- Mentoring others
- Sharing knowledge or information
- Supporting colleagues

- Willingness to consider others' opinions
- Working as an effective team
- Involvement in the Centre's Equity, Diversity and Inclusion initiatives
- Adherence to the Centre's code of conduct
- Establishing new research partnerships within the Centre or with its partners
- Building upon existing collaborations within the Centre or with its partners
- Participating in Centre activities that might seed collaboration
